

ABSTRACT OF THE DISCLOSURE

Disclosed is a method and system for generating a graphical output display of a family tree and a graphical output display of a chronological timeline, which are displayed in conjunction with each other. The result is an aesthetically pleasing display, including family member names and dates, as well as colorful images, photographs of family members, and photographs of significant people and events that have taken place at specific dates on the timeline. Dates on the family tree output are synchronized with the dates on the chronological time line.
